Our product recall database includes information and content from the Consumer Product Safety Commission, the National Highway Traffic Safety Administration and other sources. Our database is not comprehensive. For more information about reviews, www.cpsc.gov or, for car seats, www.safercar.gov. Dream On Me More Than 23,000 Dream On Me in the spring and foam mattresses for the baby's beds and beds have been recalled due to the risk of fire. According to a warning issued by the United States Consumer Product Safety Commission, these products made by Piscataway, a New Jersey-based company, did not meet mandatory federal mattress flammability standards. The CPSC says no injuries have been reported, but consumers who own these products should stop them immediately. The recalled mattresses were sold in a variety of colours and prints on Amazon.com, Kohls.com, ToyRUs.com, Walmart.com and Wayfair.com from January 2016 to December 2016 at a price ranging from \$40 to \$90. If you are unsure whether you own one of the recalled items, the model number and date of manufacture are printed on the tag in the upper center of the mattress. You can also find a full list of the recalled models here. If you have one, contact Dream On Me to get a free mattress cover that will bring the mattress according to the federal flammability standard. To make sure you stay up to date with news about items you have purchased for yourself or a family member, Selina Tedesco, a test engineer for the Good Household Institute's media lab, has a few tips: We always recommend registering your products with the manufacturer after purchase to get an update on the reviews. To get a free mattress cover, you can call Dream On Me for free at 877-201-4317 from 9:30 a.m. to 4 p.m. Monday to Friday or contact them at dreamonme.com. hT WPDE This content is created and supported by a third party and is imported to this page to help users provide their email addresses. You may be able to find more information about this and similar content on piano.io late yesterday the CPSC announced a huge crib recall involving cribs with falling down the sides. We blogged about this issue this September and also gave you tips on other ways to keep your family safe at home. JPMA (Association of Manufacturers of Juvenile Products) has also responded to this review and provides important guidelines on the proper use of cribs. Some of these include: - Parents should not use any crib with missing, broken or loose parts of the equipment. Crib slats or spindles should be pasted no more than 2 3/8 inches apart, and no one should be free or absent. Also NEVER use a cheat sheet with posts over 1/16 inch above the end panels (if they are over 16 inches high for the canopy). - NEVER killing babies sleeping on pillows, sofa cushions, adult beds, water beds, bean bags or any other surface not specifically designed for children's sleep. NEVER develop a crib near windows, drapery, drapery, or wall decorative accessories with long cords. - When using a drop-side crib and care givers should check to make sure that the drop side or any other moving parts are working properly. Parents need to make sure that the equipment is installed properly. When assembling and disassembling side cribs, parents must always certify that the parts are collected in accordance with the manufacturer's guidelines listed in the instructions. Hero Images/Getty Images The cot and car seat are probably two of the most used foods your family has, and the crib is used every night. This makes it important to make sure that your baby's crib is safe and safe. Registering your crib with a manufacturer can help you stay informed about whether it has safety issues, as can be checked with the Consumer Product Safety Commission. As of December 29, 2012, you cannot buy, sell, donate, trade or produce drop-side cribs in the US. Since 2005, more than 50 children's cribs with drop-side units have been recalled, affecting more than 11 million cribs. Some manufacturers affected by the recalls, such as Simplicity Inc., no longer work, leaving parents with cots that cannot be returned or fixed. The recalled cribs were involved in at least 32 infant and child deaths. The drop-side equipment can detach and lead to suffocation and suffocation. Drop-side cribs also sometimes have confusing instructions that have led to them putting together incorrectly, which later can lead to drop-side detachments. A cot recall can also be issued for other safety hazards, such as if the cutouts at the end of the panels allow the baby or toddler's head to fall into the trap. Other possible reasons for the recall include: Not complying with CPSC guidelines for crib safetyA problem with safety safety slating hazard involving side mesh cribThe support brackets that hold crib mattress along with a ban on drop-side cribs, stricter safety testing requirements have been placed for all cribs to simulate wear expected for years of use. They include finding screws free, supports separation, and slats breach. Any of these problems can lead to gaps that can trap a child's head and lead to suffocation. Whatever the reason for the crib recall, it is important that parents understand that they are reminded of the crib in their home and stop using it as soon as possible. Parents must register their cot with for early notification of the recall. If you become aware of the recall, get a replacement kit or repair kit from the manufacturer or replace the recalled crib. Stop using the recalled crib immediately and find an alternative such as a cradle (if your child is under 6 months of age), an age-appropriate playground (no pillow or extra bedding), a toddler's bed, or a mattress on the floor for older children who can walk. To keep your baby safe, it is also a good idea to: Avoid using the baby crib used or older baby cribs that cannot meet current baby crib safety guidelines. Contact the cot manufacturer if your crib needs repair and do not try to repair it yourself with homemade parts. Follow the cot assembly instructions carefully and call the cot manufacturer if you think you have done something wrong or do not understand something in the instructions. Regularly check your baby's crib to make sure that the equipment is not broken, including that all the screws and bolts are still tight, that the crib does not feel loose or wobbly, and that the drop side is on its way. Report any problems you have had with the cot or other baby products at CPSC. Check the consumer product safety commission's recall list. You can search by branding your crib or for all cribs on the recall date. The site has contact information to reach the manufacturer for further instructions. In 2016 or the first half of 2017 there were no reviews, which may show the effectiveness is now in force standards. That's reminiscent of the last few years. 2016: No recalls.2015: Bexco recalled nearly 18,000 DaVinci cribs due to the risk of seizure, fall and lacerations. Baby's Dream recalled 4,600 cribs and pieces of furniture for violating lead paint standards. IKEA recalled more than half a million mattresses because of the risk of seizure.2014: Bexco recalled Franklin and Ben Mason 4-in-1 convertible cribs due to falling and grabbing hazards. Oeuf recalled four models of Sparrow cribs due to the seizure of hazards.2013: Nan Far Woodworking recalled Rockland Furniture Round Cribs sold in J.C. Penny for grabbing, choking and falling hazards. About 73,000 PT Domusindo Perdana Drop-side Cribs that were sold in J.C. Penny stores have been recalled.
